Link: https://tailwindcss.com/docs/colors

Margin & Padding:

For Padding : p-range(range is not fixed)

- If px-range (left and right side)
- If py-range(top and bottom)
- pt(only top)
- pl(only left)
- Similarly pb(bottom),pr(rignt)
- Can be also p-[1 px]

For margin : m-range(same as padding)

- If mx-range (left and right side)
- If my-range(top and bottom)
- mt(only top)
- ml(only left)
- mb(botton),mr(right)
- m-[2px]

#in case er of top bottom doesn't work so we have to use class="block",inline, joto tuk dara thake tototuk width e naye.

Width,Max - width, Min-width:

- (w-size)=>width nibe ei size er ei line likha basi thakle o pore ee line chole jabe.
- (max w-size)=> er basi nibe na width
- (Min w-size)=> er theke kom nibe na width
- Can take as percentage (w-1/2,w-full,w-1/3 of a screan etc)

Link: https://tailwindcss.com/docs/width

Hight,min-hight,max-hight:

Same as width

Link:https://tailwindcss.com/docs/height

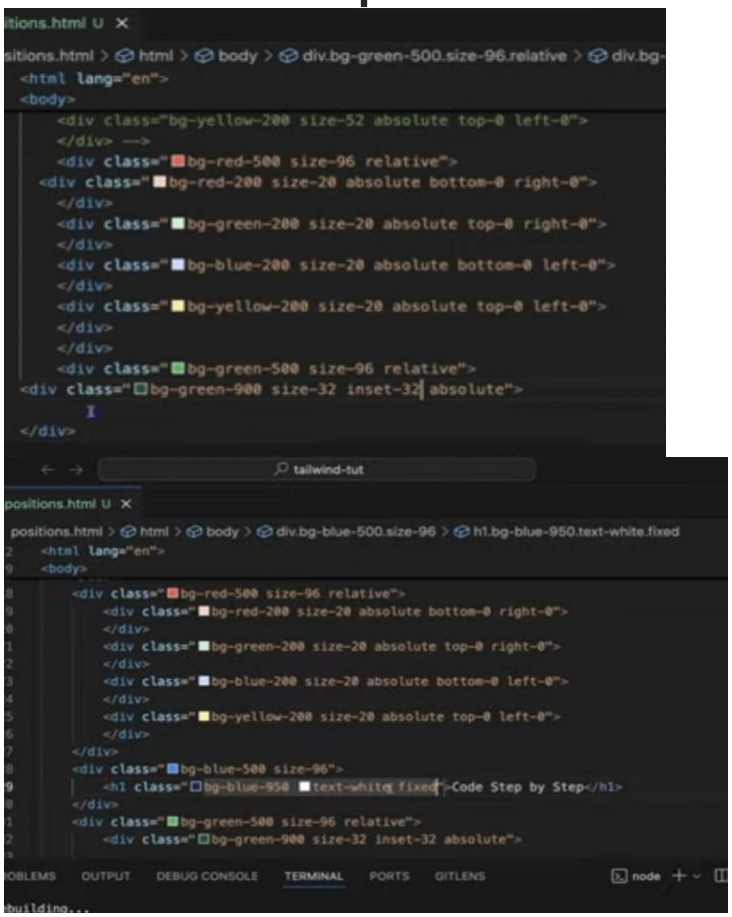
Size:

(size-value)=>

- same highth and width dite
- Size doesn’t work with min-max.
- Can also give as percentage but have to use 'h-screen' in body tag.
- Can also use (fit/full....).
- Can also use with 'hover'

Position :

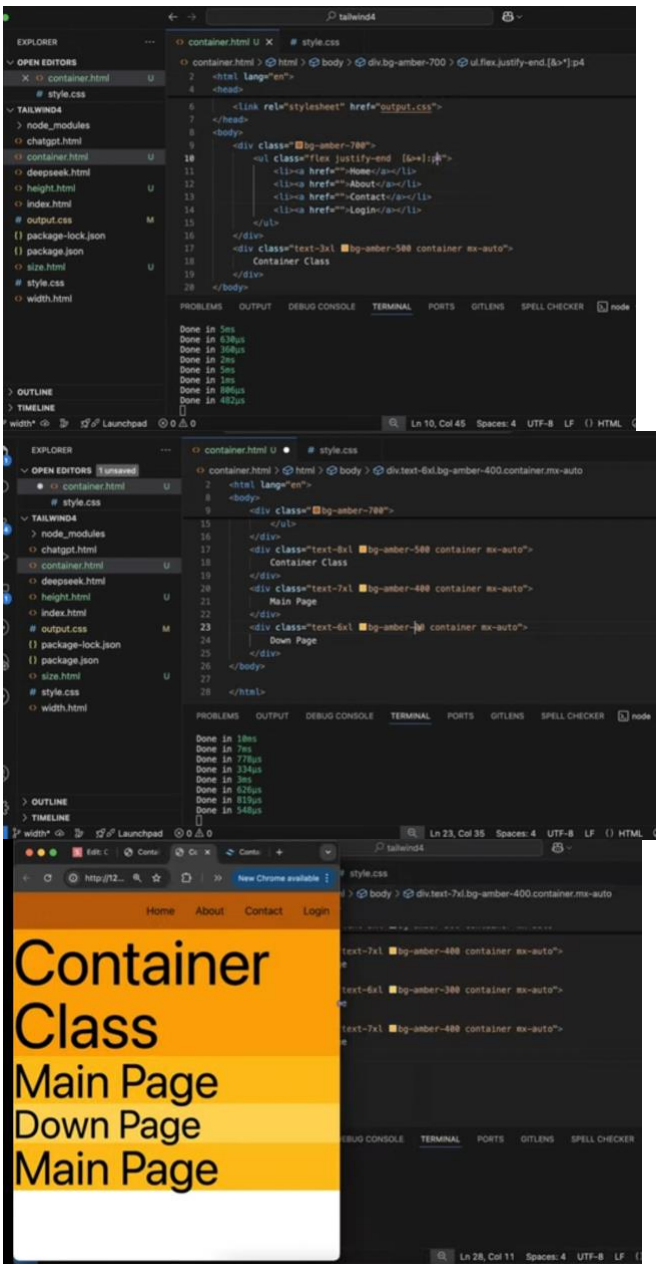
absulate top/button/middle right/left



Container:

Respponsive wap page er width manage

Link: https://tailwindcss.com/plus/ui-blocks/application-ui/layout/containers



Background classes:

Img add 1:

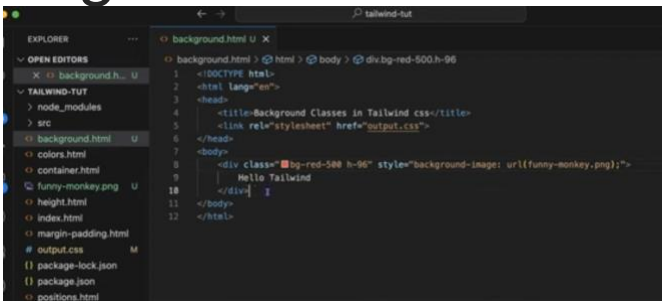


Image add 2:

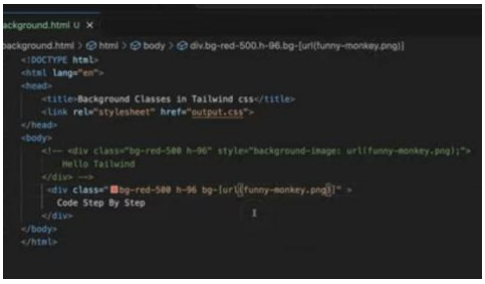

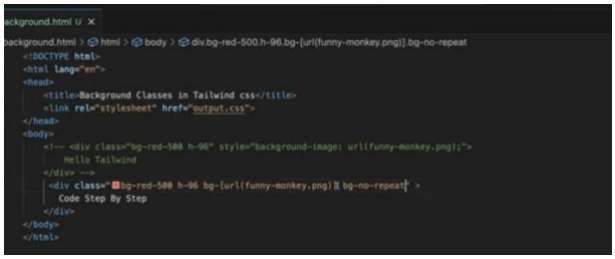

Image with no repetation:
Bg-cover (cover photo er moto).
bg-container(container er moddhe).

Example:

Filters on image :

How to use
filter {filter-class}
Prothome filter class dite hobe, tarpor specific filter add korte hobe.

1. Blur
<img src="photo.jpg" class="filter blur-sm" /> <img src="photo.jpg" class="filter blur-md" /> <img src="photo.jpg" class="filter blur-lg" />

2. Brightness
<img src="photo.jpg" class="filter brightness-50" /> <!-- Dark --> <img src="photo.jpg" class="filter

brightness-100" /> <!-- Normal --> <img src="photo.jpg" class="filter brightness-150" /> <!-- Bright -->

3. Contrast

<img src="photo.jpg" class="filter contrast-75" />
<img src="photo.jpg" class="filter contrast-125" />

4. Grayscale

<img src="photo.jpg" class="filter grayscale" /> <img src="photo.jpg" class="filter grayscale-0" /> <!-- Remove -->

5. Invert

<img src="photo.jpg" class="filter invert" />

6. Sepia

<img src="photo.jpg" class="filter sepia" />

7. Hue Rotate

<img src="photo.jpg" class="filter hue-rotate-90" />
<img src="photo.jpg" class="filter hue-rotate-180" />
<img src="photo.jpg" class="filter hue-rotate-270" />

8. Saturate

<img src="photo.jpg" class="filter saturate-150" /> <!-- More colorful --> <img src="photo.jpg" class="filter saturate-50" /> <!-- Dull -->

9. Drop Shadow (colored glow er moto)

<img src="photo.jpg" class="filter drop-shadow-lg" />

✨ Example Mix:

<img src="photo.jpg" class="filter brightness-125 contrast-125 saturate-150 rounded-xl shadow-xl" />
